MARLANE

CLIMA WOOL

COOL FABRIC TECHNOLOGY

*CLIMAwool celebrates the perfect balance between advanced technology and minimalist elegance. A journey of growing intensity leads to its ultimate peak, where the finest expression of raw material takes shape through carefully selected, **mulesing-free certified wool**.*

*The technology ensures high-performance **UV reflection**, helping to keep body temperature under control even on the hottest days, while enhancing thermal performance and delivering an advanced **cooling effect**.*

*CLIMAwool ensures unparalleled comfort through its **natural stretch** and superior breathability. The mono-stretch feature allows full freedom of movement, offering exceptional flexibility while maintaining absolute comfort.*

*Advanced **breathability** ensures continuous airflow, regulating body temperature and keeping the skin fresh and dry for lasting feeling of lightness, even on the hottest days.*

For these features, the CLIMAwool fabric capsule represents the perfect synthesis of technology and nature: functional, versatile and elegant, fully aligned with Marlane's contemporary style.
